Subject: In Support of the Lynn Canal Highway Project

The Lynn Canal Highway's time has come, and it needs to be built for a number of reasons, not the least of which is to save the State money. It would be interesting to see what the road would save in operating costs as compared to the ferry system and it's aging fleet. Not to mention the amount of fuel utilized by the ferries and the realization of ever-rising fuel costs. In addition, the ferries burn more fossil fuel than vehicles would traveling the highway. The road would also open up access to Juneau, which is crucial to it's well being. I also believe that the plan to complete the Juneau Access Project should be within the realm of five years.

Thank you,
Sally Slater
